

Integrative Neuroscience Research Center (INRC)

Spring 2012

- January 31 **Murray Blackmore, Ph.D.**
Assistant Professor
Department of Biomedical Sciences
Marquette University
"Novel Genes to Promote Axon Regeneration in the Central Nervous System"
- February 14 **Kuei Y. Tseng, M.D., Ph.D.**
Department of Cellular and Molecular Pharmacology
Rosalind Franklin University of Medicine and Science
"Synaptic Mechanisms Underlying the Development of Psychiatric Disorders and Addiction"
- February 28 **Chris Olsen, Ph.D.**
Medical College of Wisconsin
"Shedding Light on Addiction: Using Operant Sensation Seeking to Study Motivated Behavior "
- March 9 **Brain Awareness Week: Neuroanatomy Activities and Lecture**
for High School Students and General Public
3:30pm-6:30pm; Cramer Hall 016 and 087
- March 20 **Rob McCullumsmith, M.D., Ph.D.**
University of Alabama-Birmingham
School of Medicine
"Abnormalities of Glutamate Transporter Expression in Schizophrenia"
- March 27 **David Weinshenker, Ph.D.**
Emory University
"Mechanism of Disulfiram-induced Cocaine Abstinence"
- March 30 **Brain Awareness Week: Human Brain in Health and Disease**
Topics: Aging and Memory, Obesity and Spinal Cord Injury
Open to General Public
6-8pm; Cramer Hall 087
- April 10 **Ronald A. See, Ph.D.**
Medical University of South Carolina
"Chronic Methamphetamine-induced Changes in Motivational and Cognitive Neurocircuitry"
- April 24 **William A. Truitt, Ph.D.**
University of Indiana School of Medicine
"Neural Biology of Panic Disorder"
