NIH Bibliography & References Cited Guidance

December 2017

Who must complete the “Bibliography & References Cited” attachment:

The “Bibliography & References Cited” attachment is required unless otherwise noted in the FOA.

Format:

Attach this information as a PDF file separate from the Research Strategy.

Content:

The “Bibliography & References Cited” attachment should include any references cited in the Research Plan and in the Human Subjects and Clinical Trials Information.

When citing articles that fall under the Public Access Policy (peer-reviewed, accepted for publication since April 7, 2008, and are a result of NIH funding) and were authored or co-authored by the applicant, provide the NIH Manuscript Submission reference number (e.g., NIHMS97531) or the PubMed Central (PMC) reference number (e.g., PMCID234567) for each article. If the PMCID is not yet available because the Journal submits articles directly to PMC on behalf of their authors, indicate “PMC Journal – In Process.” NIH maintains a list of such journals.

Citations that are not covered by the Public Access Policy, but are publicly available in a free, online format may include URLs or PubMed ID (PMID) numbers along with the full reference. The references should be limited to relevant and current literature. While there is not a page limitation, it is important to be concise and to select only those literature references pertinent to the proposed research.

You are allowed to cite interim research products.

Note: interim research products have specific citation requirements. See related [Frequently Asked Questions](#) for more information.
