

Michelle A. Rodrigues received her B.S. in Psychology and B.S. in Ecology, Ethology, and Evolution from the University of Illinois, Urbana-Champaign, an M.A. in Anthropology from Iowa State University, and PhD in Biological Anthropology from The Ohio State University. Her research focuses on the evolution of female social relationships, stress biology, and human-primate interactions across the primate order. Her teaching interests focus on biological anthropology, human, biology, and primatology, and she is excited to bring some new perspectives on how racism and colonialism shape these fields.
