

Your International SOS Membership Benefits

Dear Members,

Marquette University uses International SOS as our workforce and travel risk management partner. International SOS is a market-leading company helping organizations around the globe protect their people from medical and security risks while at home as well as during domestic and international travel.

Some of the key benefits of our partnership with International SOS is the availability of the Assistance App and Portal, both of which are available to you for free as part of your employee benefits.

The **International SOS Assistance App** helps you plan for travel, provides advice from medical and security experts, and offers assistance from a live person anytime, anywhere. The Assistance App is free for all Marquette University faculty, staff, and students and available for download now.

The **International SOS Portal** provides comprehensive information on travel destinations, access to Marquette University documents regarding travel compliance and policies, and detailed information on the International SOS benefits available to you.

The International SOS digital tools provide **personalized pre-travel checklists, detailed location guides, and real-time updates on developing situations that may be occurring near your current location.**

We encourage you to visit the Portal and download the Assistance App today to begin taking advantage of these benefits.
