CENTER FOR PRE-HEALTH ADVISING

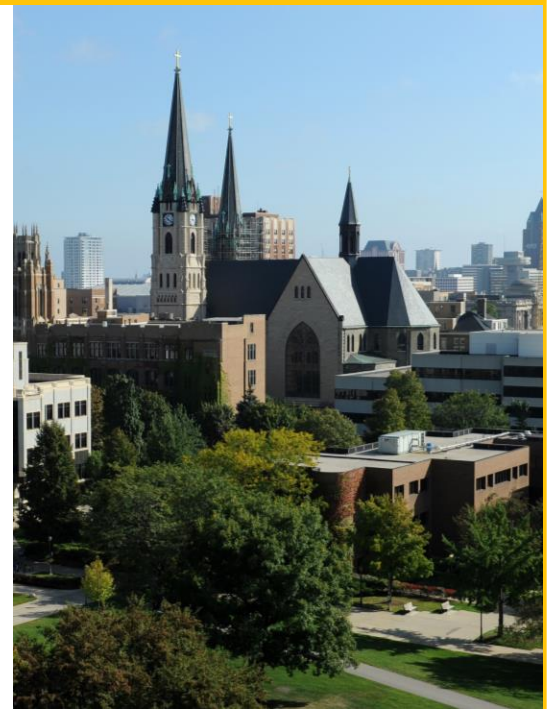

At Marquette University, pre-health is an intent, not a specific major. This allows you to choose from a wide variety of majors and then work with a pre-health adviser to identify prerequisites and application timelines for your pre-health career path and goals. Our pre-health advisers work with MU students with a variety of interests including medicine, dentistry, pharmacy, physician assistant studies, physical therapy, public health, occupational therapy, and more.

Why Pre-Health at Marquette University?

- **Interdisciplinary core curriculum ensures a well-rounded education:** The Marquette Core Curriculum (MCC) requires students to select courses from a broad range of disciplines and to examine themes from multiple perspectives. Being well-rounded academically is not only valued by health professional programs, but is also helpful on admission tests (i.e., MCAT, DAT, etc.) and in the interview process.
- **Opportunities to participate in cutting edge research:** Undergraduate students have opportunities to work with distinguished research faculty through a variety of programs including Disciplinary Honors, Summer Research Program, independent study, research internships and volunteer or paid positions.
- **Accelerated tracks:** Complete undergraduate and advanced degrees up to a year earlier than completing both degrees separately. These accelerated programs have very competitive admissions processes and are available for OT, PT, PA, Dental, and PharmD (at MCW), .
- **Other unique opportunities to enhance your MU experience:**
 - Bioethics Internship at MCW
 - Health-related minors: Spanish for the Health Professions; Health Studies; Culture, Health and Illness; Health Communication
 - Global Brigades service trips to Central America (medical, dental and public health)
