

Speech Pathology & Audiology

UNDERGRADUATE MAJOR

The undergraduate major in **Speech Pathology and Audiology (SPPA)** provides the pre-professional preparation necessary to pursue the graduate education required to work as a clinical service provider. Speech-language pathologists and audiologists work in private practice, public and private schools, hospitals, clinics, developmental centers and rehabilitation centers.

Curriculum Overview:

- The SPPA major includes courses in the areas of normal speech production and development; disorders of speech, language and hearing; and methods of evaluation and treatment.
- A variety of elective courses in the major allow you to explore different areas within the field.
- In the clinical practicum courses, you will work with children and adults experiencing speech/language/hearing problems under the supervision of faculty. Up to 50 contact hours completed as an undergraduate student can be applied toward a future graduate program.
- Curriculum flexibility readily allows for study abroad and/or pursuing a second major or minor(s).

See reverse side for a 'typical' 4-year curriculum plan

State-of-the-art clinic and research facilities:

Speech and Hearing Clinic:

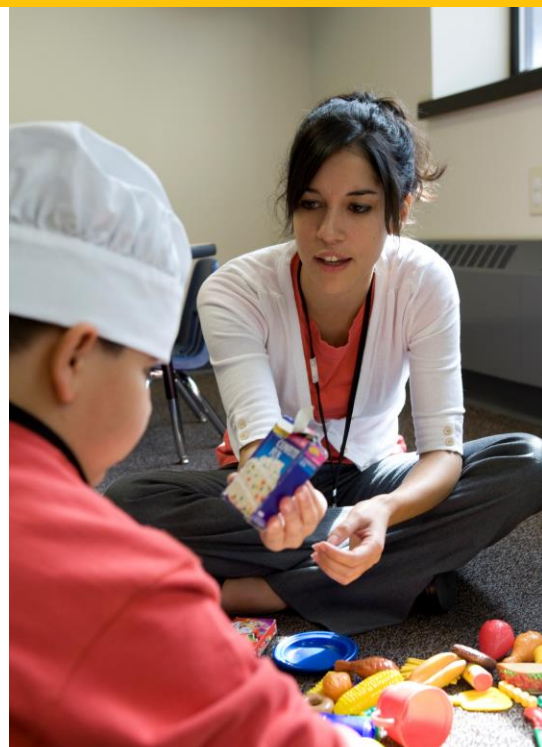

- ✓ Individual therapy rooms and diagnostic suites
- ✓ Hearing testing suite
- ✓ Augmentative/alternate communication room
- ✓ Sensory integration room

Research labs:

- ✓ Building Rehabilitation Advances in Neurosciences (BRAIN) Lab
- ✓ Neurodevelopmental Feeding and Swallowing Lab
- ✓ Communication, Movement and Learning Lab
- ✓ Speech and Swallowing Lab
- ✓ Language and Literacy Lab

Why SPPA at MU?

- **Hit the ground running and finish on time.** With acceptance directly to the Speech Pathology and Audiology program as an incoming freshman, you'll begin taking courses in the major your first semester, and graduate in four years.
- **Early Decision to MU's Graduate Program.** Qualified students in the SPPA major can apply to Marquette's Speech-Language Pathology master's program as juniors, and if admitted, not have to worry about graduate school applications during their senior year. Check that off your to-do list!
