Exciting News regarding the CPI 3.0!!!
In 2022, APTA made the decision to invest in the psychometric review of the PT and PTA CPIs to align the content and scoring model to best practices in 2023. That work was completed in partnership with Human Resources Research Organization (HumRRO) in November 2022. APTA is currently working with its new technology vendor, Competency.AI, to have these tools available for use in an electronic, mobile friendly platform with a GO LIVE DATE: May 15, 2023. Watch for information from individual programs as to when their specific transition to the new system will occur.

Since the APTA made MANY changes to the CPI including: reducing the number of criteria from 18 to 12 for PT and 18 – 11 for PTA, ALL USERS will need to take updated training to access CPI 3.0.

Five courses specific to PT and PTA CPI 3.0 can be found in the APTA Learning Center. These courses are specific to a user role and are required before one can access CPI 3.0 These courses are free, and no registration is required.
The courses include a narrated video, approximately 20-28 minutes in length based on the course version. The videos allow participants to pause or rewind but does not allow them to fast forward. The assessment includes 16-21 questions depending on the course version. Participants must score a 100% on the assessment to receive their certificate of completion. The assessment can be taken as many times as needed to achieve the passing score.

Watch for more information regarding the new platform however, please note that the CPI 3.0 will utilize the APTA SSO. Because of this, all users will need to have an APTA account. This does not mean that users need to be APTA members. If a user already has an APTA account, they do not create a new one. Users can contact APTA Member Success to obtain their account information. If a user does not have an APTA account, they can create a free APTA account. The email address used and/or the APTA number received during account set-up will be required for completing the spreadsheet. Users can obtain their APTA number by logging in to www.apta.org, clicking My Profile, and locating the APTA. Please see the attached technical brief that speaks to the process APTA used to assess and revalidate the tool and a paper for the updated CPI 3.0 tool.
